PET PROOF YOUR HOME

To prevent drowning or poisoning from cleaners, ensure that all toilet seats are down.

Cover electrical outlets and tape down loose cords so your pets don’t chew on them.

Keep windows closed or ensure that window screens are secured and sturdy so pets don’t fall out.

Check for spaces that pets can get trapped in and block them off.

Wireless Security Cameras

Secure trash cans with lids and take out the trash regularly so pets don’t rummage through it.

Pick up loose items and anything smaller than your fist.

Make sure your mulch, flowers and fertilizer are pet safe.

Video Surveillance System

Give your pet a collar that has your address on it in case they get lost so they can be returned safely.
