

Motion Detector

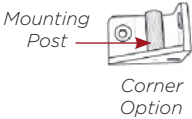

SHELF MOUNTING OPTION

If a shelf in your home offers a good view of a high traffic area you'd like to monitor, simply place this unit on the shelf. This allows you to move it from room to room if desired.

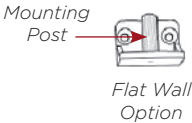

WALL MOUNTING

- 1 Choose a location.
 - » It should be placed in the corner of a room.
 - » Place it in a high traffic area where an intruder would likely pass (e.g. living room or hallway) within a 30 foot range.
 - » Place it at least 7 1/2 to 8 feet above your floor.
 - » A pet that weighs over 40 pounds may set off your motion sensor. Avoid putting it in a room where large pets may be present.

Attach to Wall

Corner Option

Flat Wall Option

- 2 Attach corner or flat wall mount to wall using provided screws and anchors.
- 3 Place the detector on the mounting post of the wall mount.
