

Image Motion Sensor

Mounting Bracket (Wall)

Mounting Bracket (Corner)

Note: this sensor uses replaceable AA batteries

- 1 Select a suitable indoor location and the appropriate mounting bracket (wall or corner).
 - » Place the unit in the area you want to monitor. Example: inside your home, near an entry door.
- 2 Using the provided screws, mount the bracket at an approximate height of 6 1/2 to 7 feet.
- 3 Hang the image motion sensor from the mounting bracket.
- 4 After installing the rest of your system, call **888.292.9368** to set up your online account.

At that time you'll be able to access your image sensor online to do a "Peek In" and set up your preferences.
